

# ROCKEFELLER & CO.

## Rockefeller Equity Allocation Fund

Trading Symbol: Institutional Class Shares (Symbol: ROCKX)  
Advisor Class Shares (Symbol: RACKX)

Summary Prospectus  
March 30, 2017

[www.rockefellerfunds.com](http://www.rockefellerfunds.com)

Before you invest, you may want to review the Rockefeller Equity Allocation Fund's (the "Equity Allocation Fund" or the "Fund") statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated March 30, 2017, are incorporated by reference into this Summary Prospectus. You can find the Fund's statutory prospectus, statement of additional information and other information about the Fund online at <http://www.rockefellerfunds.com>. You can also get this information at no cost by calling 1-855-369-6209 or by sending an e-mail request to [inquiries@rockefellerfunds.com](mailto:inquiries@rockefellerfunds.com).

### Investment Objective

The Fund seeks long-term total return from capital appreciation and income.

### Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

<b>Shareholder Fees</b> <i>(fees paid directly from your investment)</i>	<b>Institutional Class</b>	<b>Advisor Class</b>
	None	None
<hr/>		
<b>Annual Fund Operating Expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees	0.85%	0.85%
Shareholder Servicing Fees	None	0.15%
Other Expenses	0.39%	0.39%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.06%	0.06%
Total Annual Fund Operating Expenses	1.30%	1.45%
Plus Expense Recoupment	0.01%	0.00%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Recoupment <sup>(2)</sup>	1.31%	1.45%

<sup>(1)</sup> Please note that Total Annual Fund Operating Expenses in the table above do not correlate to the ratio of Expenses to Average Net Assets found within the "Financial Highlights" section of this prospectus, which does not include Acquired Fund Fees and Expenses.

<sup>(2)</sup> Pursuant to an operating expense limitation agreement between Rockefeller & Co., Inc., the Fund's investment adviser (the "Adviser"), and the Fund, the Adviser has agreed to waive its management fees and/or reimburse Fund expenses to ensure that Total Annual Fund Operating Expenses (exclusive of front-end or contingent deferred loads, taxes, leverage, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, dividends or interest expenses on short positions, acquired fund fees and expenses or extraordinary expenses such as litigation) do not exceed 1.25% and 1.40% of the Fund's average daily net assets for Institutional Class shares and Advisor Class shares, respectively, through at least March 30, 2018. The operating expense limitation agreement can be terminated only by, or with the consent of, the Trust's Board of Trustees (the "Board of Trustees"). The Adviser is permitted to recoup management fee reductions and/or expense payments made in the three year period from the date of the waiver or reimbursement if such reimbursement will not cause the Fund to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment.

### Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The operating expense limitation agreement discussed in the table above is reflected only through March 30, 2018. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<b>Share Class</b>	<b>One Year</b>	<b>Three Years</b>	<b>Five Years</b>	<b>Ten Years</b>
Institutional Class	\$133	\$413	\$714	\$1,569
Advisor Class	\$148	\$459	\$792	\$1,735

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may generate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs and potentially higher taxes, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 58.83% of the average value of its portfolio.

## Principal Investment Strategies

The Fund seeks to achieve its investment objective of long-term total return from capital appreciation and income by investing its assets globally in a range of equity asset classes and, to a lesser extent, in fixed income securities, real estate and commodity linked equities (such as real estate investment trusts (“REITs”) and master limited partnerships (“MLPs”)), and currencies. The Adviser will allocate the Fund’s assets across asset classes taking into consideration both the Adviser’s longer-term strategic outlook as well as tactical views as to potential near-term opportunities. The Adviser considers a number of factors when making allocation decisions, including relative attractiveness among equity market capitalizations and geographic regions, inflation risks and factors that influence commodity prices.

Under normal market conditions, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. Equity securities in which the Fund may invest include common stocks, preferred stocks, depositary receipts, interests in REITs and MLPs, and interests in other investment companies and exchange-traded funds (“ETFs”) that invest in equity securities. The Fund may invest in equity securities of U.S. and foreign companies (including issuers domiciled in emerging markets or less developed countries) with market capitalizations of any size. The Fund’s investments in common stocks of foreign companies may include depositary receipts, such as American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”). The Fund invests a portion of its assets in securities that are traded in currencies other than U.S. dollars, so the Fund may buy and sell foreign currencies to facilitate transactions in portfolio securities. The Fund generally will not seek to hedge against currency risks, although the Fund may engage in such hedging strategies if the Adviser determines that it may be advantageous to do so.

Equity exposure will be obtained primarily through allocations among investment strategies managed by the Adviser. These equity strategies may include global equities, regional equities and sector/industry-specific equities. The Adviser’s strategies may focus on particular market capitalizations (large cap, mid-cap or small-cap) or may invest across all market capitalizations. The strategies also may invest in growth stocks, value stocks, and cyclical stocks (and in combinations thereof), and may have investment objectives seeking capital appreciation, income and total return. In selecting investments for these strategies, the Adviser applies a bottom-up security analysis that includes fundamental, sector-based research in seeking to identify businesses that have high or improving returns on capital, barriers to competition and compelling valuations.

In addition, the Fund may, under normal market conditions, invest up to 20% of its net assets in fixed income securities, commodity-linked instruments and currencies, as well as interests in other investment companies and ETFs that invest in such asset classes, in an effort to enhance portfolio returns and/or reduce risk. The Fund’s investments in fixed income securities may include, but are not limited to, securities of varying maturities, durations and ratings, including securities that have been rated below investment grade by a nationally recognized statistical ratings organization (“NRSRO”), commonly referred to as “junk bonds” or “high yield bonds”, and securities which have not been rated by NRSROs.

## Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose all or a portion of your investment in the Fund over long or even short periods of time.** The principal risks of investing in the Fund are:

- *General Market Risk.* The value of the Fund’s shares may fluctuate based on the performance of the Fund’s investments and other factors affecting the securities markets generally.
- *Management Risk.* The Adviser’s judgments about the attractiveness, value and potential appreciation of the Fund’s investments may prove to be incorrect and the investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies.
- *Allocation Risk.* The Fund’s ability to achieve its investment objective depends upon the Adviser’s ability to effectively allocate the Fund’s assets among various asset classes and investment strategies. There is the risk that the Adviser’s allocation methodology and assumptions regarding asset classes and investment strategies may be incorrect in light of actual market conditions and may negatively impact the Fund’s performance.

- *Equity Markets Risk.* The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- *Large Capitalization Companies Risk.* Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-cap companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.
- *Small and Medium Capitalization Companies Risk.* Small and medium capitalization companies may not have the management experience, financial resources, product diversification and competitive strengths of large capitalization companies and, therefore, their securities tend to be more volatile than the securities of larger, more established companies and may be less liquid than other securities.
- *Master Limited Partnerships Risk.* MLP investment returns are enhanced during periods of declining or low interest rates and tend to be negatively influenced when interest rates are rising. In addition, most MLPs are fairly leveraged and typically carry a portion of a "floating" rate debt. As such, a significant upward swing in interest rates would also drive interest expense higher. Furthermore, most MLPs grow by acquisitions partly financed by debt, and higher interest rates could make it more difficult to make acquisitions. MLP investments also entail many of the general tax risks of investing in a partnership. There is always a risk that an MLP will fail to qualify for favorable tax treatment. Limited partners in an MLP typically have limited control and limited rights to vote on matters affecting the partnership.
- *Real Estate Risk.* Adverse changes in general economic and local market conditions, supply or demand for similar or competing properties, taxes, governmental regulations or interest rates, as well as the risks associated with improving and operating property, may decrease the value of REITs in which the Fund may invest. Additionally, there is always a risk that a REIT will fail to qualify for favorable tax treatment.
- *Foreign Securities and Currency Risk.* Non-U.S. securities are subject to risks relating to political, social and economic developments abroad and differences between U.S. and foreign regulatory requirements and market practices, including fluctuations in foreign currencies. Issuers of foreign securities may not be required to provide operational or financial information that is as timely or reliable as those required for issuers of U.S. securities. The income or dividends earned on foreign securities may be subject to foreign withholding taxes.
- *Emerging Markets Risk.* Countries in emerging markets are generally more volatile and can have relatively unstable governments, social and legal systems that do not protect shareholders, economies based on only a few industries, and securities markets that trade a small number of issues. Emerging market securities may be subject to relatively more abrupt and severe price declines due to the smaller securities markets, lower trading volumes and less government regulation of securities markets in emerging market countries compared to those in developed countries. Investments in emerging market securities generally are more illiquid and volatile and subject to a higher risk of settlement disruptions than investments in securities of issuers in developed countries.
- *Foreign Currency Exchange Contracts Risk.* These contracts may fall in value in response to foreign market or currency fluctuations with respect to the country to which they relate. The Fund's strategy of investing in these instruments may not be successful. Investment in these instruments also subjects the Fund to counterparty risk.
- *Fixed-Income Securities Risks.* Fixed-income securities are or may be subject to interest rate, credit, liquidity, prepayment and extension risks. Interest rates may go up resulting in a decrease in the value of the fixed-income securities held by the Fund. Credit risk is the risk that an issuer will not make timely payments of principal and interest. There is also the risk that an issuer may "call," or repay, its high yielding bonds before their maturity dates. Fixed-income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed-income securities may make it more difficult to sell or buy a security at a favorable price or time.
  - o *Interest Rate Risk.* In times of rising interest rates, bond prices will decline. Generally, securities with longer maturities and funds with longer weighted average maturities carry greater interest rate risk.
  - o *Extension Risk.* In times of rising interest rates, prepayments will slow causing portfolio securities considered short or intermediate term to be long-term securities, which fluctuate more widely in response to changes in interest rates than shorter term securities.
  - o *Liquidity Risk.* There may be no willing buyer of the Fund's portfolio securities and the Fund may have to sell those securities at a lower price or may not be able to sell the securities at all, each of which would have a negative effect on performance.

- o *Prepayment Risk.* In times of declining interest rates, the Fund's higher yielding securities will be prepaid and the Fund will have to replace them with securities having a lower yield.
- *High-Yield Fixed-Income Securities Risk.* High-yield fixed income securities or "junk bonds" are fixed-income securities held by the Fund that are rated below investment grade and are subject to additional risk factors such as increased possibility of default, illiquidity of the security, and changes in value based on public perception of the issuer. Such securities are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities.
- *Other Investment Company and Exchange-Traded Fund Risk.* When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including management fees. The risk of owning an ETF generally reflects the risks of owning the underlying investments the ETF holds. The market price of an ETF's shares may trade at a discount to their net asset value, or an active trading market for an ETF's shares may not develop or be maintained. The Fund also will incur brokerage costs when it purchases and sells ETFs.
- *Preferred Stock Risk.* Preferred stock represents an interest in a company that generally entitles the holder to receive, in preference to the holders of common stock, dividends and a fixed share of the proceeds resulting from a liquidation of the company. Preferred stocks are generally subordinated in right of payment to all debt obligations and creditors of the issuer.
- *Commodities Markets Risk.* Exposure to commodity markets through investments in commodity-linked instruments may subject the Fund to greater volatility than investments in traditional securities. This difference is because the value of companies in commodity-related businesses may be affected by overall market movements and other factors affecting the value of a particular industry or commodity, such as weather, disease, embargoes, or political and regulatory developments.
- *Cybersecurity Risk.* With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

**Performance**

The performance information demonstrates the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year and since inception periods compare with those of a broad measure of market performance. Remember, the Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at [www.rockefellerfunds.com](http://www.rockefellerfunds.com) or by calling the Fund toll-free at 1-855-369-6209.

<sup>(1)</sup> The returns shown in the bar chart are for Institutional Class shares of the Fund. Advisor Class shares would have substantially similar annual returns because the shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the classes do not have the same expenses. Advisor Class shares are not currently offered for purchase.

The calendar year-to-date return for the Fund's Institutional Class shares as of December 31, 2016 was 5.24%. During the period shown in the bar chart, the best performance for a quarter was 6.21% (for the quarter ended September 30, 2016). The worst performance was -0.76% (for the quarter ended March 31, 2016).

*Average Annual Total Returns  
(for the Periods Ended December 31, 2016)*

	<u>One Year</u>	<u>Since Inception (2/4/15)</u>
<b>Institutional Class Shares</b>		
Return Before Taxes	5.24%	1.82%
Return After Taxes on Distributions	5.00%	1.63%
Return After Taxes on Distributions and Sale of Fund Shares	3.14%	1.38%
<b>MSCI All Country World Index (Net)</b> (reflects no deduction for fees, expenses or taxes)	7.86%	2.42%

Returns are shown for Institutional Class shares only and will vary for Advisor Class shares. Advisor Class shares are not currently offered for purchase. After-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are calculated using the historical highest individual federal marginal income tax rates in effect and do not reflect the effect of state and local taxes. The after-tax returns shown are not relevant to those investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts ("IRAs").

**Management**

*Investment Adviser*

Rockefeller & Co., Inc. is the Fund's investment adviser.

*Portfolio Manager*

David P. Harris, CFA, Chief Investment Officer and Managing Director of the Adviser, and Jimmy C. Chang, CFA, Chief Investment Strategist, Senior Portfolio Manager and Managing Director of the Adviser, have served as the portfolio managers of the Equity Allocation Fund since it commenced operations in February 2015.

**Purchase and Sale of Fund Shares**

You may purchase or redeem Fund shares via written request by mail (Rockefeller Funds, c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701), by wire transaction, or by contacting the Fund by telephone at 1-855-369-6209, on any day the New York Stock Exchange ("NYSE") is open for trading. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. Minimum initial and subsequent investment amounts are shown below.

<u>Share Purchase Amounts</u>	<u>Institutional Class</u>	<u>Advisor Class</u>
Minimum Initial Investment	\$1,000,000	\$100,000
Minimum Subsequent Investment	\$10,000	\$1,000

**Tax Information**

Distributions made by the Fund will be taxed as ordinary income or long-term capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account ("IRA"). You may be taxed later upon withdrawal of monies from such tax-deferred arrangements.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase Fund shares through a broker-dealer, or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your adviser or visit your financial intermediary's website for more information.
