

## Firm overview

Rockefeller & Co., Inc. is a global investment management and wealth advisory firm serving successful families, institutions, foundations, endowments, and high net worth individuals.

## Objective

The Rockefeller Core Taxable Bond Fund seeks to generate current income consistent with the preservation of capital.

## Investment Philosophy

The Fund's investment philosophy is based on analysis of macro-economic conditions and complemented by fundamental credit research. To select investments for the Fund, we apply the macro-economic analysis by considering securities of any maturity which appear to offer the best relative value given our forward market and economic assumptions. Our bottom-up research process seeks to identify and avoid issuers which could have significant negative changes in credit quality. In addition to traditional macro-economic and credit analysis, we also consider market sentiment and behavioral factors when assessing a security's relative value and worthiness within a portfolio seeking principal protection and income.

## Why Invest in this Fund

- A process oriented investment approach focusing on principal preservation and income.
- Disciplined credit research process seeking to identify and avoid significant negative changes in credit quality.
- Duration is adjusted in an effort to maintain the fund's role as a potential stabilizer in an investor's overall asset allocation.
- Broader investment perspective based on regular team interactions with senior investment professionals of Rockefeller & Co. including its equity asset management team.

## Average Portfolio Performance (As of June 30, 2017)

	3 Month	Year-to-Date	1 Year*	3 Year*	Since Inception* (12/26/13)
<b>Rockefeller Core Taxable Bond Fund – Inst. Class</b>	<b>1.07%</b>	<b>1.75%</b>	<b>-0.30%</b>	<b>2.06%</b>	<b>2.56%</b>
Bloomberg Barclays Aggregate Bond Index	1.45%	2.27%	-0.31%	2.48%	3.27%

**Total annual fund operating expenses: 0.67%**

**\*Annualized return**

*Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800.237.7119.*

## Sector Breakdown

## Credit Quality

**Credit Quality** Individual bond credit ratings are determined using credit ratings assigned by Standard & Poor's and Moody's Investor Services. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). When ratings are available from both rating agencies, the lowest rating is used. Securities which are not rated by either rating agency are designated as "Not Rated", except that the Fund's adviser has assigned mutual funds held in the portfolio the average credit quality reported by Morningstar. Cash & equivalents includes investments in money market funds. Credit ratings are subject to change and are not guarantees of performance.

Verizon Communications, Inc.	03/16/2037	5.250%	3.14
Morgan Stanley	07/24/2042	6.375%	2.91

**\*SEC 30-Day Yield** This calculation is based on a 30-day period ending on the last day of the previous month. It is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The yield figure reflects the dividends and interest earned during the period, after the deduction of the funds expenses.

**Average Maturity** Average Maturity is a weighted average of each bond's effective maturity and the average maturity reported by Morningstar for mutual funds held in the Fund's portfolio. Cash and equivalents (including money market funds) are assigned a maturity date of less than one year. A bond's effective maturity takes into account the possibility that the bond may be called before its stated maturity date. Mutual funds that have longer average maturities are generally considered more interest-rate sensitive than funds with shorter average maturities. **Duration** Duration is a measure of the sensitivity of an asset or portfolio's price to interest rate movements. **Rounding** Due to rounding, totals reported for Sector Breakdown, Credit Quality and Maturity Breakdown may not equal 100%. **Differences** Sector Breakdown, Credit Quality, Average Maturity and Duration were calculated by the Fund's adviser using third party software. The results of this analysis may differ from information reported directly by the Fund.

The Bloomberg Barclays Aggregate Bond Index is an unmanaged index which is widely regarded as a standard for measuring U.S. investment grade bond market performance. One cannot invest directly in an index.

**Mutual fund investing involves risk. Principal loss is possible. The Fund is susceptible to adverse economic, political, tax, or regulatory changes which may magnify other risks. Income from tax-exempt funds may become subject to state and local taxes and a portion of income may be subject to the Federal Alternative minimum tax for certain investors. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. Investing in the municipal securities market is volatile and can be significantly affected by adverse tax, legislative or political changes and the financial condition of the issuers of municipal securities. Investments in Asset Backed and Mortgage Backed Securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic development. The Fund may invest in restricted securities or "private placement" transactions. Private placement securities are not registered under the Securities Act, and are subject to restrictions on resale. As such they are often both difficult to sell and to value. The Fund may invest in ETF's which are subject to additional risks, including the risks that the market price of an ETF's shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares.**

*The fund's investment objectives, risks, charges and expenses must be considered carefully before investing.
