

**Rockefeller Equity Allocation Fund
Rockefeller Core Taxable Bond Fund
Rockefeller Intermediate Tax Exempt National Bond Fund
Rockefeller Intermediate Tax Exempt New York Bond Fund
Each, a series of Trust for Professional Managers (the “Trust”)**

**Supplement dated July 27, 2022
to the Summary Prospectuses, Prospectus and Statement of Additional Information
dated March 30, 2022**

The Board of Trustees (the “Board”) of the Trust, based upon the recommendation of Rockefeller & Co. LLC (the “Adviser”), the investment adviser to the Rockefeller Equity Allocation Fund, Rockefeller Core Taxable Bond Fund, Rockefeller Intermediate Tax Exempt National Bond Fund and Rockefeller Intermediate Tax Exempt New York Bond Fund (each, a “Fund,” and collectively, the “Funds”), has determined to close and liquidate the Funds. The Board concluded that it would be in the best interests of the Funds and their shareholders that the Funds be closed to new purchases, except for purchases made through an automatic investment program or the reinvestment of any distributions, as of the close of business on July 27, 2022 (the “Closing Date”) and liquidated as series of the Trust effective as of the close of business on August 26, 2022 (the “Liquidation Date”).

The Board approved a Plan of Liquidation (the “Plan”) that determines the manner in which the Funds will be liquidated. Pursuant to the Plan and in anticipation of the Funds’ liquidation, **the Funds will be closed to new purchases, except for purchases made through an automatic investment program or a purchase exception that is approved by Trust officers, effective as of the close of business on the Closing Date, after which each Fund’s assets may be entirely invested in money market instruments or held in cash. Accordingly, the Funds will no longer be pursuing their investment objectives.** However, any distributions declared to shareholders of the Funds after the Closing Date and until the close of trading on the New York Stock Exchange on the Liquidation Date will be automatically reinvested in additional shares of the respective Fund unless a shareholder specifically requests that such distributions be paid in cash. Although the Funds will be closed to new purchases as of the Closing Date, you may continue to redeem your shares of the Funds until the Liquidation Date, as described in “How to Redeem Shares” in the Funds’ Prospectus.

Pursuant to the Plan, if the Funds have not received your redemption request or other instruction prior to the close of business on the Liquidation Date, your shares will be redeemed and you will receive proceeds representing your proportionate interest in the net assets of the respective Fund as of the Liquidation Date, subject to any required withholdings. As is the case with any redemption of Fund shares, these liquidation proceeds will generally be subject to federal and, as applicable, state and local income taxes if the redeemed shares are held in a taxable account and the liquidation proceeds exceed your adjusted basis in the shares redeemed. If the redeemed shares are held in a qualified retirement account such as an IRA, the liquidation proceeds may not be subject to current income taxation under certain conditions. You should consult with your tax adviser for further information regarding the federal, state and/or local income tax consequences of this liquidation that are relevant to your specific situation.

The Adviser will bear all of the expenses incurred in carrying out the Plan.

Shareholder inquiries should be directed to the Funds at 1-855-369-6209.

Summary Prospectus

March 30, 2022

www.rockefellerfunds.com

Before you invest, you may want to review the Rockefeller Intermediate Tax Exempt New York Bond Fund's (the "Fund") statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated March 30, 2022, are incorporated by reference into this summary prospectus. You can find the Fund's statutory prospectus, statement of additional information and other information about the Fund online at <http://www.rockefellerfunds.com>. You can also get this information at no cost by calling 1-855-369-6209 or by sending an e-mail request to inquiries@rockefellerfunds.com.

Investment Objective

The Fund seeks to generate current income that is exempt from federal, New York State and New York City personal income tax consistent with the preservation of capital.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and Example below.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Institutional Class	Advisor Class
	None	None
<hr/>		
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees	0.35%	0.35%
Shareholder Servicing Fees	None	0.15%
Other Expenses	0.43%	0.43%
Total Annual Fund Operating Expenses	0.78%	0.93%

Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<u>Share Class</u>	<u>One Year</u>	<u>Three Years</u>	<u>Five Years</u>	<u>Ten Years</u>
Institutional Class	\$80	\$249	\$433	\$966
Advisor Class	\$95	\$296	\$515	\$1,143

Portfolio Turnover

The Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs and potentially higher taxes, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year ended November 30, 2021, the Fund’s portfolio turnover rate was 22.56% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by investing under normal market conditions at least 80% of its net assets (plus any borrowings for investment purposes) in municipal bonds and other fixed income securities that generate income exempt from regular federal, New York State and New York City personal income tax, including the federal alternative minimum tax (“AMT”). The Fund may invest in all types of municipal bonds, including, but not limited to, general obligation bonds, industrial development bonds, government bonds and other obligations issued by the State of New York, its subdivisions, authorities, instrumentalities and corporations. The Fund may also invest in asset-backed and mortgage-backed securities, other investment companies, exchange-traded funds (“ETFs”) and obligations of other issuers that pay interest that is exempt from regular federal and New York State and New York City personal income tax. While the Fund will invest primarily in tax exempt securities, it is possible that up to 20% of the Fund’s total assets may be invested in fixed income securities that generate income that is not exempt from regular federal income tax, New York State and New York City personal income tax, including the federal AMT. The Fund invests primarily in investment grade fixed income securities rated in the top four ratings categories by independent rating organizations such as Standard & Poor’s Ratings Group (“S&P”) and Moody’s Investors Service, Inc. (“Moody’s”) or another nationally recognized statistical rating organization (“NRSRO”), or deemed by the Adviser to be of comparable quality. While the Fund may invest in securities of any duration, the Adviser anticipates the weighted average duration of the Fund’s portfolio will be more than three years but less than ten years. The Fund is non-diversified.

The Fund’s investment philosophy is based on a combination of forecasted macro-economic conditions over a six- to twelve-month horizon and is complemented by bottom-up fundamental research. To select investments for the Fund, the Adviser applies the macro-economic analysis by considering securities of any duration which appear to offer the best relative value. The Adviser’s bottom-up research process seeks to identify and avoid issuers which could have significant negative changes in credit quality. In addition to traditional macro-economic and credit analysis, the Adviser may also consider market sentiment and behavioral factors when assessing a security’s relative value and worthiness within a portfolio seeking principal protection and income.

The Fund may also invest in fixed income securities rated below investment grade by an independent rating agency when purchased, including high-yield fixed income securities, and in unrated or split rated securities deemed by the Adviser to be of comparable quality. Such securities are also known as “junk bonds” or “high yield bonds.”

The Fund may invest in securities that are illiquid, thinly traded or subject to special resale restrictions, such as those imposed by Rule 144A promulgated under the Securities Act of 1933, as amended (the “Securities Act”). The Fund’s investments may also include securities that do not produce immediate cash income, such as zero-coupon bonds. The Fund may also purchase and sell securities on a when-issued basis, which involves a commitment by the Fund to purchase or sell securities at a predetermined price or yield, but where payment for the securities is not required until the delivery date.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose all or a portion of your investment in the Fund over long or even short periods of time.** The principal risks of investing in the Fund are:

- *General Market Risk.* The value of the Fund’s shares may fluctuate based on the performance of the Fund’s investments and other factors affecting the securities markets generally.
- *Management Risk.* The Adviser’s judgments about the attractiveness, value and potential appreciation of the Fund’s investments may prove to be incorrect and the investment strategies employed by the Adviser in selecting

investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies.

- *New York-Specific Risk.* The Fund is susceptible to adverse economic, political or regulatory changes specific to New York, which may magnify other risks and make the Fund more volatile than a municipal bond fund that invests in more than one state. If the government of New York State or any local New York governmental entities are unable to meet their financial obligations, the Fund's income, NAV, and ability to preserve or realize appreciation of capital or liquidity could be adversely affected. The current economic and political environment may result in New York municipal issuers experiencing difficulties in meeting their financial obligations. The economic outlook of New York is unpredictable and in certain cases is heavily dependent on the financial activities sector. Market conditions may also impact the liquidity and valuation of New York municipal securities and the ability of entities issuing municipal securities to successfully sell the securities in the public credit markets.
- *Municipal Securities Risks.* The municipal market is volatile and can be significantly affected by adverse tax, legislative or political changes and the financial condition of the issuers of municipal securities. Because the Fund may invest more than 25% of its total assets in municipal obligations issued by entities located in the same state or the interest on which is paid solely from revenues of similar projects, changes in economic, business or political conditions relating to a particular state or types of projects may have a disproportionate impact on the Fund. Budgetary constraints of local, state, and federal governments upon which the issuers may be relying for funding may also impact municipal securities. In addition, changes in the financial condition of an individual municipal insurer can affect the overall municipal market, and market conditions may directly impact the liquidity and valuation of municipal securities.
- *Fixed Income Securities Risks.* Fixed income securities are or may be subject to interest rate, credit, liquidity, prepayment and extension risks. Interest rates may go up resulting in a decrease in the value of the fixed income securities held by the Fund. Credit risk is the risk that an issuer will not make timely payments of principal and interest. There is also the risk that an issuer may "call," or repay, its high yielding bonds before their maturity dates. Fixed income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time.
 - *Interest Rate Risk.* In times of rising interest rates, bond prices will decline. Generally, securities with longer maturities and funds with longer weighted average maturities carry greater interest rate risk.
 - *Extension Risk.* In times of rising interest rates, prepayments will slow causing portfolio securities considered short or intermediate term to be long-term securities, which fluctuate more widely in response to changes in interest rates than shorter term securities.
 - *Liquidity Risk.* There may be no willing buyer of the Fund's portfolio securities and the Fund may have to sell those securities at a lower price or may not be able to sell the securities at all, each of which would have a negative effect on performance.
 - *Prepayment Risk.* In times of declining interest rates, the Fund's higher yielding securities will be prepaid and the Fund will have to replace them with securities having a lower yield.
- *Asset-Backed and Mortgage-Backed Securities Risk.* Asset-backed and mortgage-backed securities are subject to risk of prepayment. These types of securities may also decline in value because of mortgage foreclosures or defaults on the underlying obligations. Mortgage-backed securities offered by non-governmental issuers are subject to other risks as well, including failures of private insurers to meet their obligations and unexpectedly high rates of default on the mortgages backing the securities. Other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as risks associated with the nature and servicing of the assets backing the securities. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk.
- *Government-Sponsored Entities Risk.* The Fund invests in securities issued or guaranteed by government-sponsored entities. However, these securities may not be guaranteed or insured by the U.S. Government and may only be supported by the credit of the issuing agency. Securities issued by U.S. Government agencies and instrumentalities have different levels of U.S. Government credit support. Some are backed by the full faith and credit of the U.S. Government, while others are supported by only the discretionary authority of the U.S. Government or only by the credit of the agency or instrumentality. No assurance can be given that the U.S. Government will provide financial support to U.S. Government-sponsored instrumentalities because they are not

obligated to do so by law. Guarantees of timely prepayment of principal and interest do not assure that the market prices and yields of the securities are guaranteed nor do they guarantee the net asset value or performance of the Fund, which will vary with changes in interest rates, the Adviser's success and other market conditions.

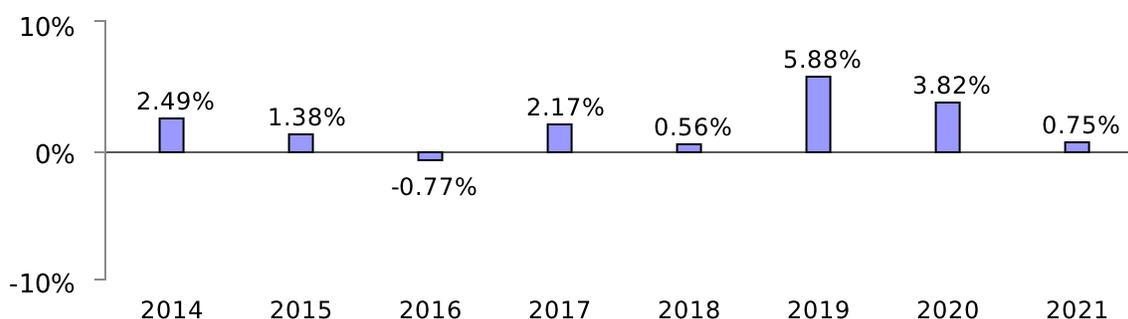

- *Restricted Securities Risk.* The Fund may invest in restricted securities (securities with limited transferability under the securities laws) acquired from the issuer in "private placement" transactions. Private placement securities are not registered under the Securities Act, and are subject to restrictions on resale. They are eligible for sale only to certain qualified institutional buyers, like the Fund, and are not sold on a trading market or exchange. While private placement securities offer attractive investment opportunities otherwise not available on an open market, because such securities are available to few buyers, they are often both difficult to sell and to value.
- *High-Yield Fixed Income Securities (Junk Bond) Risk.* High-yield fixed income securities or "junk bonds" are fixed income securities held by the Fund that are rated below investment grade and are subject to additional risk factors such as increased possibility of default, illiquidity of the security, and changes in value based on public perception of the issuer. Such securities are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities.
- *Non-Diversified Risk.* The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in the obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.
- *Tax Risk.* Municipal securities may decrease in value during times when tax rates are falling. The Fund's investments are affected by changes in federal, New York State, and New York City income tax rates applicable to, or the continuing federal, New York State, and New York City tax-exempt status of, interest income on municipal obligations. Any proposed or actual changes in such rates or exempt status, therefore, can significantly affect the liquidity, marketability and supply and demand for municipal obligations, which would in turn affect the Fund's ability to acquire and dispose of municipal obligations at desirable yield and price levels. If you are subject to the federal AMT, you may have to pay federal tax on a portion of your distributions from tax-exempt income. If this is the case, the Fund's net after-tax return to you may be lower.
- *When-Issued Securities Risk.* The price or yield obtained in a when-issued transaction may be less favorable than the price or yield available in the market when the securities delivery takes place, or that failure of a party to a transaction to consummate the trade may result in a loss to the Fund or missing an opportunity to obtain a price considered advantageous.
- *Zero-Coupon Bond Risk.* Zero-coupon bonds do not pay interest on a current basis and may be highly volatile as interest rates rise or fall. In addition, while such bonds generate income for purposes of generally accepted accounting standards, they do not generate cash flow and thus could cause the Fund to be forced to liquidate securities at an inopportune time in order to distribute cash, as required by tax laws.
- *Other Investment Company and Exchange-Traded Fund Risk.* When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including management fees. The risk of owning an ETF generally reflects the risks of owning the underlying investments the ETF holds. The market price of an ETF's shares may trade at a discount to their net asset value, or an active trading market for an ETF's shares may not develop or be maintained. The Fund also will incur brokerage costs when it purchases and sells ETFs.
- *Cybersecurity Risk.* With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.
- *Valuation Risk.* The prices provided by the Fund's pricing service or independent dealers or the fair value determinations made by the valuation committee of the Board of Trustees may be different from the prices used by other mutual funds or from the prices at which securities are actually bought and sold. The prices of certain securities provided by pricing services may be subject to frequent and significant change, and will vary depending on the information that is available.

- *Recent Market Events Risk.* U.S. and international markets have experienced significant periods of volatility in recent months and years due to a number of economic, political and global macro factors including rising inflation and the impact of the coronavirus (COVID-19) as a global pandemic which has resulted in a public health crisis, business interruptions and growth concerns in the U.S. and overseas. While U.S. and global economies are recovering from the effects of COVID-19, the recovery is proceeding at slower than expected rates and may last for a prolonged period of time.

Performance

The performance information demonstrates the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compare with those of a broad measure of market performance. Remember, the Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.rockefellerfunds.com or by calling the Fund toll-free at 1-855-369-6209.

Institutional Class Shares⁽¹⁾
Calendar Year Returns as of December 31

⁽¹⁾ The returns shown in the bar chart are for Institutional Class shares of the Fund. Advisor Class shares would have substantially similar annual returns because the shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the classes do not have the same expenses. Advisor Class shares are not currently offered for purchase.

During the period shown in the bar chart, the best performance for a quarter was 2.41% (for the quarter ended March 31, 2019). The worst performance was -2.31% (for the quarter ended December 31, 2016).

Average Annual Total Returns (for the Periods Ended December 31, 2021)

	One Year	Five Year	Since Inception (12/26/13)
Institutional Class Shares			
Return Before Taxes	0.75%	2.62%	2.00%
Return After Taxes on Distributions	0.38%	2.48%	1.78%
Return After Taxes on Distributions and Sale of Fund Shares	1.20%	2.27%	1.69%
Bloomberg Managed Money Short-Intermediate Index (reflects no deduction for fees, expenses or taxes)	-0.17%	3.03%	2.69%

Returns are shown for Institutional Class shares only and will vary for Advisor Class shares. Advisor Class shares are not currently offered for purchase. After-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are calculated using the historical highest individual federal marginal income tax rates in effect and do not reflect the effect of state and local taxes. The after-tax returns shown are not relevant to those investors who hold their shares through tax-deferred or other tax-advantaged arrangements such as 401(k) plans or individual retirement accounts ("IRAs").

In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax benefit to the investor.

Management

Investment Adviser

Rockefeller & Co. LLC is the Fund's investment adviser.

Portfolio Managers

Andrew M. Kello, Portfolio Manager of the Adviser, has served as co-portfolio manager of the Tax Exempt New York Bond Fund since September 2016. Stefan Langer, Assistant Portfolio Manager of the Adviser's Fixed Income Team, has served as co-portfolio manager of the Tax Exempt National Bond Fund since March, 2021.

Purchase and Sale of Fund Shares

You may purchase or redeem Fund shares via written request by mail (Rockefeller Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701), by wire transaction, or by contacting the Fund by telephone at 1-855-369-6209, on any day the New York Stock Exchange (“NYSE”) is open for trading. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. Minimum initial and subsequent investment amounts are shown below.

<u>Share Purchase Amounts</u>	<u>Institutional Class</u>	<u>Advisor Class</u>
Minimum Initial Investment	\$1,000,000	\$100,000
Minimum Subsequent Investment	\$10,000	\$1,000

Tax Information

The Fund intends to make distributions that will be exempt from regular federal income tax. However, some of these Fund's distributions may be taxed as ordinary income or long-term capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an IRA. You may be taxed later upon withdrawal of monies from such tax-deferred or other tax-advantaged arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
